

EMERGENCY MEDICINE RESEARCH VOLUNTEER (EMReV) PROGRAM

Charles V. Keating Emergency Department
NSHA/Dalhousie University

LOCATION

1796 Summer Street, Halifax, NS Canada

COVID-19 STATUS

Specified

DATES

Starts after September 1st

Ends By May 1st

DESCRIPTION

The Research Program will enable the Emergency Department to advance patient care through investigational research, ranging from public health surveys to studies on the efficiency of medications and procedural interventions. Our interns also assist with conducting department quality improvement initiatives. Our volunteers develop basic research skills and learn many medical concepts in preparation for careers in healthcare.

We aim to both increase knowledge for the betterment of patient care in Emergency Medicine and to prepare our interns for the next step in their medical careers. This program is intended to introduce participants interested in healthcare to the fast-paced environment of a Trauma Level One Emergency Department and educate our volunteers on whether or not Emergency Medicine is a viable career pathway in their futures.
